A real-time computer system may be a component of a larger system in which it is embedded; reasonably, such a computer component is called an embedded system. Applications and examples of real-time systems are ubiquitous and proliferating, appearing as part of our commercial, government, military, medical, educational, and cultural infrastructures.

What Are Real-Time Embedded Systems?

Real-Time Embedded Multithreading: Using ThreadX ... for real-time embedded systems by requiring that the time necessary to process any task ... real-time performance is actually possible for that application. 3.7 Kernel A kernel is a minimal implementation of an RTOS.
