resampling methods for dependent pdf

This is a book on bootstrap and related resampling methods for temporal and spatial data exhibiting various forms of dependence. Like the resampling methods for independent data, these methods provide tools for statistical analysis of dependent data without requiring stringent structural assumptions.

Resampling Methods For Dependent Data 1st Edition

Bootstrapping Dependent Data One of the key issues confronting bootstrap resampling approximations is how to deal with dependent data. Consider a sequence $\{X_t\}_{t=1}^n$ of dependent random variables. Clearly it would be a mistake to resample from the sequence scalar quantities, as the resampled resamples would break the temporal dependence.
