Infectious mononucleosis (IM, mono), also known as glandular fever, is an infection usually caused by the Epstein-Barr virus (EBV). Most people are infected by the virus as children, when the disease produces few or no symptoms. In young adults, the disease often results in fever, sore throat, enlarged lymph nodes in the neck, and tiredness. Most people recover in two to four weeks; however ...

Abstract. This evidence-based clinical practice guideline is a revision of the 2004 acute otitis media (AOM) guideline from the American Academy of Pediatrics (AAP) and American Academy of Family Physicians.

The Diagnosis and Management of Acute Otitis Media | From

A guidelines development group was formed to assess the available evidence, develop recommendations, and decide on their strength on the basis of the balance between benefits and harms, the evidence quality, cost and resource use implications, and user and patient values and preferences.
