

scanning tunneling microscopy i pdf

A scanning electron microscope (SEM) is a type of electron microscope that produces images of a sample by scanning the surface with a focused beam of electrons. The electrons interact with atoms in the sample, producing various signals that contain information about the surface topography and composition of the sample. The electron beam is scanned in a raster scan pattern, and the position of ...

WELCOME. Welcome to the web page of the low temperature laboratory of the Universidad Autonoma de Madrid. Here you can find information about who we are and what we do. We belong to the Condensed Matter Physics Department and to the Institute Nicolás Cabrera of the Faculty of Sciences and the IFIMAC (Condensed Matter Physics Center) of the Universidad Autonoma de Madrid.
