David DeSteno studies the ways in which emotions guide decisions and behaviors fundamental to social living. By examining moral and economic behaviors such as compassion and trust, cooperation and resilience, and dishonesty and prejudice, his work tries to illuminate how emotions can optimize our actions in favor of the greater good or, by virtue of bugs in the system, lead to suboptimal or ...

Virtue (Latin: virtus, Ancient Greek: ἀρετή "arete") is moral excellence. A virtue is a trait or quality that is deemed to be morally good and thus is valued as a foundation of principle and good moral being. Personal virtues are characteristics valued as promoting collective and individual greatness. In other words, it is a behavior that shows high moral standards.

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

Virtue ethics is currently one of three major approaches in normative ethics. It may, initially, be identified as the one that emphasizes the virtues, or moral character, in contrast to the approach that emphasizes duties or rules (deontology) or that emphasizes the consequences of actions (consequentialism).
