

self similarity and beyond pdf

In a general metric space (X, d) , an exact similitude is a function f from the metric space X into itself that multiplies all distances by the same positive scalar r , called f 's contraction factor, so that for any two points x and y we have $(f(x), f(y)) = (r \cdot d(x, y))$. Weaker versions of similarity would for instance have f be a bi-Lipschitz function and the scalar r a limit

Similarity (geometry) - Wikipedia

Self-organization, also called (in the social sciences) spontaneous order, is a process where some form of overall order arises from local interactions between parts of an initially disordered system. The process is spontaneous, not needing control by any external agent. It is often triggered by random fluctuations, amplified by positive feedback. The resulting organization is wholly ...

Edward B. Tylorâ€™s Primitive Culture articulates one of two major theories of culture to emerge around 1870. His theory defines culture in descriptive terms as the â€œcomplex wholeâ€• that makes up social ideas and institutions, and in this it helped to establish anthropology as a recognized science.
