For the record, here is a link to the book "Self-Steering for Sailing Craft" by John S Letcher jr The approach is 1960s era, before the domination of vane steering by servo-pendulum gears. But it remains the only full discussion, as far as I'm aware, of the tricks and physics of making a boat go in a straight line by sail control alone, and the ideas and observations in it are still valid.

Self Steering. John Letcher's "Self-steering for sailing craft" is a good resource and of interest to anyone using self-steering, with or without vane gear. You can see it below, copyright John S Letcher and with kind permission of the author, who made many small boat ocean voyages and contributed much to the development of yacht self-steering.

Blue Anarchy >> Self Steering Without A Windvane. Building a windvane yourself is possible, but that usually requires welding and access to a machine shop. The alternative self-steering systems can be just as reliable, and they also help to cultivate an enhanced understanding of sail trim, sail balance, and the forces that are at work as your boat moves through the water.

Sailing without wind sensor and other hardware and software innovations 3 Fig. 1 Sub-Figure (b) shows a classical design of a wind vane self steering device when the rudder is on the stern. In this case there is a need to invert the rotation between the wind vane and the rudder using gears for example.
