Levelling & Surveying Page 2 Pacific Island Hydrology Course NIWA: April 2004 A run is the levelling between two or more points measured in one direction only.

3 LEVELLING & SURVEYING - WHYCOS Portal (@ WMO)

Levelling (British English) or leveling (American English); is a branch of surveying, the object of which is to establish or verify or measure the height of specified points relative to a datum. It is widely used in cartography to measure geodetic height, and in construction to measure height differences of construction artifacts.

Levelling - Wikipedia

Surveying or land surveying is the technique, profession, and science of determining the terrestrial or three-dimensional positions of points and the distances and angles between them. A land surveying professional is called a land surveyor. These points are usually on the surface of the Earth, and they are often used to establish maps and boundaries for ownership, locations, such as building ...
